Abstract

Abstract of approximately 100-200 words.

Keywords: Keyword1, keyword2, ..., keyword(n).

1 Instructions for authors

Info for DEON2027 Authors are invited to submit an original, previously unpublished, research paper on the topics of DEON. Parallel submission to journals or to other conferences or workshops with published proceedings is not permitted. The paper should be in English and should be no longer than 15 pages (excluding references and technical appendix) when formatted according to the DEON2027 LaTeX template or DEON2027 Word template. Reviewers are not required to read the technical appendix and may choose to do so at their discretion. This file contains the Word template specification.

The reviewing process for DEON2027 is double-blind and submissions must be anonymized. In particular: do not include author names, affiliations, or contact details anywhere in the paper; remove acknowledgements, funding information, and project identifiers (these may be added back in the camera-ready version); refer to your own previous work in the third person; do not include links to non-anonymized repositories or personal web pages; and remove identifying metadata from the PDF file. Submissions that clearly violate these requirements may be rejected without review. The first page should contain an abstract of approximately 100-200 words. Authors should submit their papers as a PDF (applies to the LaTeX as well as Word template) electronically using EasyChair.

¹ You can put your email address or grant acknowledgement as a footnote, if you wish.
(Footnotes are pt.9)

For accepted papers, the camera-ready version must be prepared in LaTeX using the official DEON LaTeX template and should be no longer than 20 pages, including appendices and bibliography. The final submission must include all files required for compilation (.tex, .bib, and image files) together with the compiled PDF. Authors of papers initially prepared in Word are solely responsible for converting their paper into the required LaTeX template.

For DEON2027, we will use the stylesheet that was also used for DEON2016 and DEON2025. We thank all those who contributed to previous versions of the stylesheet.

General Info on the Style Important information pertaining to the preparation of your paper (for the Word template):

- On acceptance, the final version of the paper **must** be submitted using the LaTeX template DEON2027 and restrictions of the LaTeX stylefile DEON16. The conversion of the word file to the appropriate LaTeX template is the sole responsibility of the authors of the accepted paper and will not be done by the editors.
- It is strictly prohibited to tamper with the text dimensions, including adding to the text height or width. The dimensions of the style files are already taken to the limit of what the printer of the final proceedings is able to handle. Also, use of negative white space commands are not allowed.
- The template of this word file must be considered (including margins, font size, spacing, and other predetermined settings).
- Even pages contain the title of the paper as header.
- Odd pages contain the last names of the author(s) as header. For the anonymized submission, use "Anonymous" as the header instead, and restore the author surnames only in the camera-ready version.

Additional instructions:

- The first paragraph of a section should not be indented. Starting from the second one must be indented with 0,5cm.
- Font for the Word submission is Times New Roman.
- Before and after each (sub)section heading there must be spacing of one line.
- Section heading is 13pt. Subsections are 12pt.
- Main text is 10pt. Abstract and references are 9pt.
- Spacing before and after itemizations and enumerations, as well as theorems, definitions, proofs, are 6pt.

2 Introduction

This is a section of the paper. Add space before and after section heading. The main text of Theorems, Propositions, Lemmas, and Corollaries is italicized. The main text of Definitions, Examples, Notes, and Remarks is not italicized (see examples below).

Definition 2.1 This is a definition.

Lemma 2.2 *This is a lemma...*

Proof. ...and this is how it's proved.

This is a citation of an important paper [1], without which the present paper could never have been.

Appendix

Here starts the appendix. If you don't wish an appendix, omit it.
